--SEE OFFICE ACTION ON THE FOLLOWING PAGES--

Receipt is acknowledged of IDS, Extension, Declaration, IDS and amendment (10/09/01).

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 7-17, drawn to chitosan, classified in class 514, subclass 55.
- II. Claims 18-31, drawn to a process of obtaining, classified in class 536, subclass 20.

The inventions are distinct, each from the other because:

Inventions of Groups I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the chitosun can be obtained from other processes, such as Arthropod starting material.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1616

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
